### **DETAILED ACTION**

This office action is in response to application filed on 12/03/03. Claims 1-30 are still pending in this application.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Independent claims 1, 11, 21, 28, and 30 along with their corresponding dependent claims recite "automatically providing information to remotely access a web page". Examiner submits that remotely accessing a web page is missing in the specification. On page 5 of the specification it is stated that the client agent automatically initiates a chat session via an Internet Reply Chat (IRC) channel. The chat session sets up a text communication via electronic mail between the client and the help server. The client agent initiates an automatic refresh that recalls the subject page and assists the client agent in forwarding the appropriate information to the help server. Nothing in regard to remotely accessing web page was discussed.

#### ***Response to Arguments***

Applicant's arguments filed 12/03/03 have been fully considered but they are not persuasive.

Applicant argued that Price does not teach a web page and remotely accessing a web page in request for help by a client.

Examiner respectfully submits that Price reference, which was interpreted broadly, discloses all the limitations of the applicant's invention as claimed (see prior office action for details).

Applicant is also requested to address the 112 (2<sup>nd</sup> paragraph) rejection issued previously by the examiner when responding to this office action.
